Spanish

PROFILE

Accomplished Front-End Developer with 3.5+ years honing React JS and React Native prowess. Dedicated to pixel-perfect design execution, I bridge concepts to captivating user interfaces. Adaptable and team-oriented, my expertise spans industries, advocating rigorous development standards.

I embrace challenges eagerly, embodying an open-minded, innovative spirit that consistently produces impactful solutions.

WORK EXPERIENCE

Software developer

Effectus Software

2020 - Present

At Effectus I have been working with React JS, React Native & Vue. Since March 2020, I have been very involved in the UI design process and making the designs come true using mainly React. I work to deliver products that offer a world-class user experience.

Full Stack developer

Ibisdev

2019 - 2020

At Ibisdev I worked with Vue and Strapi, I have created some landing pages for the french market using Strapi as a CMS to create stable and scalable products.

IT Specialist

Sutherland Global Services

2017 - 2019

At Sutherland I worked for the Google division doing IT support at the Google Workspace catalog including Gmail, Drive, Sites, etc.

PROJECTS

CarChat - React Native

Carchat is a project that allows drivers to receive real-time notifications and warnings about their cars based on updates from other drivers. By using Carchat, drivers can gain access to important information about their vehicles, such as unpaid bills, insurance status, and maintenance needs. Also, you can have information provided by other drivers who may have noticed something about the car that the owner did not. Carchat helps ensure that cars are always in good condition and ready to be driven when needed.

Akko - Vue, React Native

AKKO is a web and mobile application that allows you to get coverage for their items against costly damage and theft. AKKO makes facilitating and managing protection for your stuff more efficient and less expensive.

Offen - React Native

Offen is a mobile application for creating and discovering events orientated to the right crowd. The app is exclusively for events hosted in the US. Even though it's not the app's primary objective, Offen can also be used as a social network, being able to chat and invite your friends to join.

Rate&See - React

Rate&See is a web application that helps users find the perfect movie to watch. Rate&See gets the data of movies, cast, and directors from TMDB. As a user, you can rate movies, add movies to your watchlist and users can follow each other to see other user rates; with this data, we created a browse of movies with recommendations for each user and you can also see the rates and tips for the user you follow.

CEA - React

CEA is a web application that involves the most popular e-sports to help users creates strategies, and charts. It also tracks matches, teams, and tournaments. It's a big tool that helps teams captains and admins manage and control the team's performance and follow and analyze collegiate and corporate e-sports tournaments.

Chilltravel - React Native

Chilltravel is an app to help travelers make common luggage smart by adding a QR to it. It basically allows any person that finds a piece of lost luggage to share location information and let the owner know about it. It also provides an admin panel to all of the airports to control what's happening around its facility.
